

How Airtraq simplifies Video Intubation

- Airtraq's channel simplifies ETT insertion reducing intubation time.
- No stylet needed. Avoids potential injuries. Eliminates stylet costs.
- 90° shape minimizes hyperextension and reduces force required.
- Reduces hemodynamic reactivity.
- Facilitates intubation from any position (face to face, etc.).
- High intubation success rate in difficult airways.
- Easier to learn than other video laryngoscopes.

Multiple viewing options

90° channel simplifies intubation

Minimum capital investment allows availability in every location

Two complementary models for one complete solution

AIRTRAQ AVANT

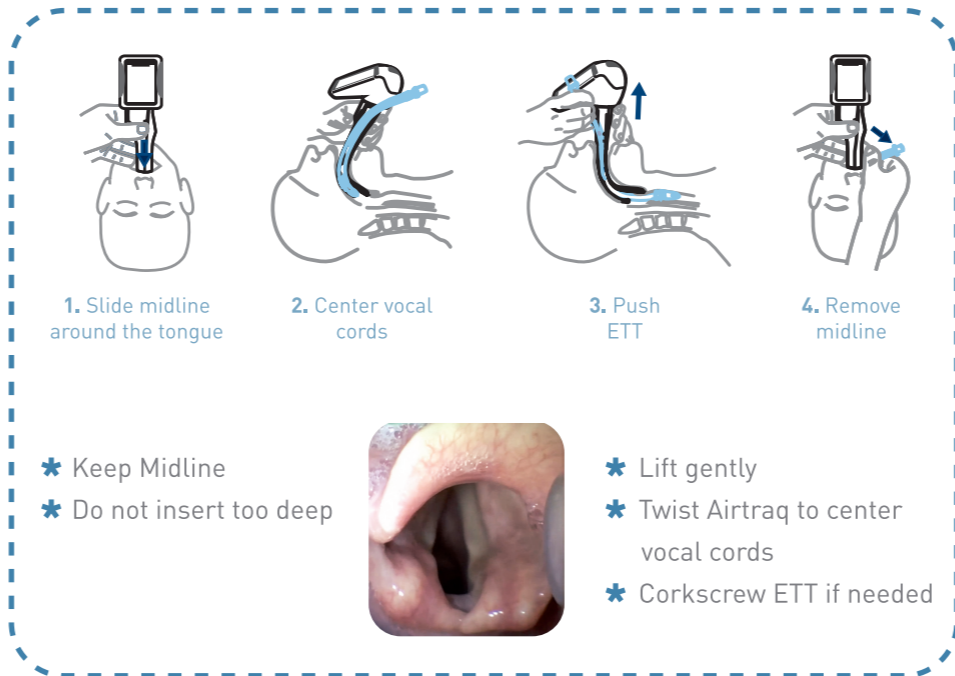

Reusable Optics + Disposable Blades

Minimum cost per intubation.
VL for frequent use.

AIRTRAQ SP

Fully Disposable

One piece. Ready to use.
VL for remote locations and emergencies.

Airtraq improves routine intubations and it is specially effective for:

- ➔ Cervical immobilization
- ➔ Obese
- ➔ Awake
- ➔ In combination with a fiberscope
- ➔ Frontal or lateral intubations
- ➔ Poor dentition
